

Consisted of 200 LED Bulbs through a high quality copper wire the string light can be easily bended and shaped into any shape as you like. Such as twining around plants and furniture or pinned across walls and ceilings. Because of it's thin profile the copper wire is invisible when the light is turned on.

Safety

The power adapter is certified with UL for business and home use. It's 5 feet cord will make sure the adapter is tucked away safely. The whole fixture including LED bulbs, copper wire, controller and power adaptor is water proof and is able to be used both indoor and outdoor environment without any worry of weather damage or short circuit. The bulbs are made of LED lighting source with very low heat emission that remains cool even after many hours of usage.

Warnings

- Serial connection will cause uneven brightness, please do not connect more than 2 lights together;
- Do not cut the string light as this will break the circuit and damage the light beyond repair;
- Although the lights are build with safety measures, it's not recommended leaving the light unattended or turn ON permanently.
- This is not a toy. Please keep it away from children;
- Do not hang anything from the string light as the extra weight will break the light and cause potential fire hazard;
- Be careful not to damage the wire or LEDs when using staples, nails and other sharp objects.

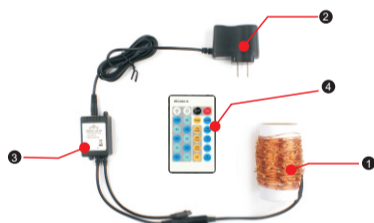

Warranty

This product is covered with parts and labor warranty for 12 months from date of the original purchase from authorized retailers or distributors. Please contact us immediately to launch a warranty claim. We will instruct you on how to return the defective unit back to us for repair or replacement;
